

Task Ninja App — Feature List

Core Features

- **Task Creation & Management**
Create, edit, delete, and view tasks with fields for title, description, due date, priority, and category.
 - **Subtasks Support**
Add multiple subtasks to a main task, with options to manually enter or auto-generate subtasks using AI.
 - **Task Categories & Priorities**
Assign custom categories and set task priorities (Low, Medium, High) to organize tasks effectively.
 - **Reminders**
Automatic reminders for due and overdue tasks displayed on dashboard load.
 - **Task Status Tracking**
Mark tasks as completed or pending with clear status indicators.
-

User Features

- **User Profile Management**
Update user profile details (name, email) within a dedicated profile page.
 - **Authentication**
Simple login/logout interface to manage session flow (mock version for prototype).
-

UI & Usability Features

- **Responsive Design**
Fully responsive layout for desktops and mobile devices.

- **Filtering & Search**
Filter tasks by category or status using the sidebar search/filter component.
 - **Clean Task Dashboard**
Task cards displaying quick task information and actionable buttons (view, edit, delete).
-

Additional Features

- **Footer Links**
Quick access links: GitHub repository (left) and Contact Support (right).
- **Persistent Storage**
Task data loaded from and saved to a local JSON file (simulated for frontend prototype).
